

Private, Public and
Hybrid Cloud Integration

Enterprise Cloud Services:

- Specialized expertise for complex, “hybrid” IT environments – integration of cloud with legacy environments
- Service-level agreement of 99.95 percent availability for every virtual machine
- Fully-staffed support for round-the-clock monitoring and management
- Dedicated support for installation and configuration
- Multi-site high availability and fail-over options
- Optional managed services include SAP® services, Citrix XenApp®, Microsoft® SQL Database®, Microsoft® Exchange Server and Blackberry® Enterprise Server services
- Consulting services to assist with cloud readiness, migration services and optimization

Sigma CloudSource Powered by Sungard AS®

Will your computing resources be there when you need them? Will your applications and data remain protected? Can you continue to leverage your existing environments while taking advantage of new technologies? With Sigma CloudSource Powered by Sungard AS, the answer is “yes”.

Together, Sigma and Sungard Availability Services (AS) deliver world-class IT infrastructure and operational support in either multi-tenant or dedicated, private environments. Achieve these business benefits with Sigma CloudSource Powered by Sungard:

- **Availability** – Multiple layers of protection and failover options keep your business up and running
- **Cost containment** – Average 35 percent savings by eliminating the costs associated with hardware lifecycle for new projects or a technology refresh for existing environments
- **Flexibility** – Ability to scale your environment, allowing you to expand as you grow
- **Application stability** – Strict process discipline and change management to minimize risk and ensure application stability
- **Speed to market** – Leverage technology to drive new projects, decrease time to market and potentially reach new prospects

Why Sigma CloudSource for Sungard AS cloud computing?

Your local Sigma team learns about your business, customers and strategic goals. Then, in collaboration with Sungard AS, we build customized solutions from the ground up, starting with proofs of concept through application testing with performance assessment on to broad deployment and training.

We provide the necessary services that support even the most dynamic and demanding environments. Sigma and Sungard AS are tightly integrated with a number of partners, including EMC® and NetApp®. We deliver hosted EMC solutions, including Isilon, VNX and VMAX/Symmetrix. Additionally, we support cloud service offerings built on efficient NetApp storage and data management solutions.

Sigma Solutions is the solutions integrator of choice for enterprise companies needing a technology partner that easily transitions from the strategy of the executive suite to the operations of the data center. Visit sigmasol.com or call 888.895.0495 to learn more.
