Oracle Offerings Supported

- Oracle SPARC T-Series Servers
- Oracle SPARC SuperCluster
- Oracle Database
- Oracle Database Appliance
- Oracle ZFS
- Sun SPARC
- Sun x86
- Oracle Solaris
- Oracle Exadata
- Oracle Exalogic
- Oracle M-Series

Sigma and Oracle Deliver Integrated Solutions

You wouldn't buy a car in parts and try to build yourself. Yet, that's what most companies do with IT. The parts are produced by different manufacturers and it's complicated and time-consuming to get them to function as a whole. Sigma Solutions and Oracle partner to provide a broad portfolio of applications, middleware, databases, operating systems, virtual machines, servers and storage – all engineered to work together and tailored to your unique requirements. Whether you want to deploy private database clouds, integrate a shared services SOA platform within your existing application infrastructure or improve consolidation efficiency by up to 50 percent, Sigma and Oracle will help you make it happen.

As a fast-growing Gold-level Partner, Sigma Solutions leverages its experience, deep industry knowledge, and vendor relationships to devise advanced IT infrastructure solutions. With Sigma, you can:

- Take your hardware to the next level by relying on a leading Sun reseller with a track record of success
- Expand your software capabilities with one of the best product lines in the industry and qualified implementation engineers focused on Oracle
- Manage solutions with confidence and free your IT staff to execute your business strategy by offloading storage, server, backup and compute operations
- Get the most out of your hardware and/or software investment by relying on an expert who has a local presence and clear understanding of your short- and long-term goals

Oracle Solutions

Through our proven C.I.O. (Consult, Implement, Operate) delivery methodology, we can help you deploy our joint Sigma and Oracle solutions:

- **Database:** Enable many users to concurrently access the same data, deliver high-performance transaction processing, prevent unauthorized access and protect your business from downtime with Oracle's database—one of the top database systems in the market today.
- **Enterprise Applications:** Manage sales performance and revenue, deliver a personalized cross-channel buying experience to customers, easily execute marketing campaigns and measure ROI—do all this and much more with Oracle's enterprise application solutions.
- **Cloud Computing:** Build infrastructure, platform, and software as a service offerings within your organization using Oracle cloud computing. Private clouds with control and visibility into security and regulatory compliance, public clouds with cross-application process integration—whatever your cloud needs, Oracle has a complete solution.
- **Engineered Systems:** Imagine a converged infrastructure in which servers, databases, storage, and operating systems are designed to work together for extreme performance and scalability. With Oracle engineered systems, it is a reality.

Why Sigma Solutions?

Vision: Our experience designing and integrating enterprise data center solutions gives our clients access to skills and expertise beyond their in-house IT teams and traditional resellers.

Execution: Our highly trained professional services team configures and implements complex projects with hardware and software from multiple vendors and suppliers.

Operations: Our managed services team removes the burden of managing specific IT resources, allowing in-house IT teams to focus on more strategic initiatives.

Expertise: Our unmatched technical expertise has been developed via investments in training, certification and technologies.

Proof: Our extensive lab and equipment pool is available for proof-of-concept development and "try before you buy" demonstrations.

Sigma Solutions' Oracle Resources

Sigma has a full team of professionals to support our customers with their Oracle solutions:

- Field Sales Representatives
- Pre-Sales Technical Resources
- Post-Sales Technical Resources

Sigma Service Offerings for Oracle

- **Assessment and Scoping Services:** Assessment, design and workshop services for data center virtualization, end-user computing and cloud
- **Implementation Services:** Integration, testing and execution of virtualized environments
- **Lifecycle Services:** Managed services for 24x7 monitoring, remote engineering and support, proactive maintenance and ongoing management in a predictable, monthly flat-rate cost structure

Complementary Technologies

Sigma has developed longstanding relationships with the industry's leading manufacturers. We maintain the necessary relationships, certifications and accreditations to ensure our customers have the right resources for their continued success. Sigma Solutions boasts expertise in the following NetApp complementary technologies:

Sigma Solutions is the solutions integrator of choice for enterprise companies needing a technology partner that easily transitions from the strategy of the executive suite to the operations of the data center.
