

# The Sigma VNX 5x5 Advantage

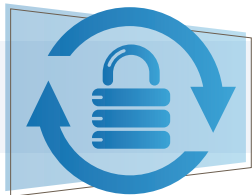

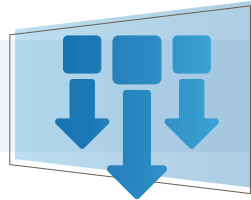

Your aging EMC® CLARiiON® and Celerra® systems are ill-equipped to handle the big data-crunching challenges ahead. And extending the life of these systems costs time, money and a competitive foothold – none of which you can afford to lose. At Sigma, we hear you LOUD and CLEAR!

## Here are 5 Reasons to Move to EMC VNX:

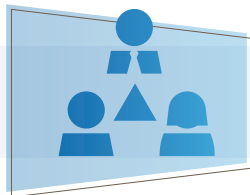

1. Increase performance 6X and response time by 60%

2. Reduce drive count by 2/3 and capacity by 50%

3. Get total protection – local or remote – with DVR-like recovery

4. Sign in once and complete all tasks in minutes – not hours

5. Spend less management time and use fewer resources

## Here are 5 Reasons to Work with Sigma Solutions:

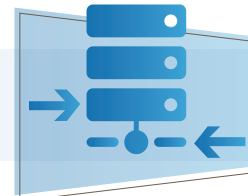

1. Expect vendor-trained and certified VNX expertise

2. Navigate migration with an EMC Velocity Signature Partner

3. Determine your “best fit” VNX model and optimize its performance

4. Make one call at any time for full lifecycle support

5. Expedite your storage, virtual and cloud transformation
