

SIGMA MATCH

"Sigma Match has been our sole source to fill our hard-to-find, crucial-to-the-business skill sets. They find the right people for us quickly, which is paramount to getting our projects completed and to us staying competitive. The service we receive is awesome! I recommend the Sigma Match team wholeheartedly."

— Director at Energy Management Company

"Sigma Match has been a great partner for us in finding creative and technical talent. Nothing slips through the cracks when they are on the job! Great results, very personable team and high energy."

— Talent Manager, Advertising Agency

Sigma Match: Your Talent Acquisition Partner

When you need skilled IT resources for complex projects, large-scale, iterative deployments or short-term tasks to fill gaps, Sigma Match delivers the right resource to get the job done.

Finding the right fit for any organization starts with understanding the technical requirements of the job and the internal culture of the organization. Sigma Match takes a partnership approach with our clients; first we identify your hiring goals and challenges so we can be a value added resource. We have a very disciplined process that allows us to prioritize our client needs and provide the right match. Sigma has taken the knowledge and expertise gained and applied it to creating a staffing solution that fits your technical requirements and cultural needs.

Consider Sigma Match your "other" HR, with expert recruiters trained to find top-notch talent 24/7. We place skilled professionals – Support/Help Desk & QA pros, developers and graphic designers, project managers and DBAs, directors and CIOs and many others – to create teams that will quickly deliver lasting value. Our staffing services include:

- **Contract:** Perfect when you need resources, but have no FTEs budgeted, require specialized skill sets for the short term or are facing an expedited drop date or product launch.
- **Contract to Hire:** Ideal for "trying out" a new employee to ensure you have the right fit; also a good approach when FTE budget is forecasted in the future, but needed now.
- **Permanent:** When you are ready to add a permanent employee, our broad reach can make all the difference, especially in a highly competitive candidate-driven market.

Technical Titles:

- Business Analyst
- Data Warehouse Architect
- Database Administrator
- Database Architect
- Developer Analyst
- Enterprise Architect
- Help Desk
- Mobile Developers
- Network Administrator
- Network Engineer
- Project Lead
- Project Manager
- Software Test Analyst
- System Analyst
- Technical Support
- Technical Writer
- Web Design

"Thank you for the great candidates that you sent to us based on the specifications we had given you. Sigma Match has surpassed my expectations and actually made it hard for me to make a decision as all the candidates were very qualified. I also wanted you to know that the person we chose is doing an outstanding job. I needed someone to come in and run with the ball without much direction and this is just what he is doing. He is very professional and understands how to deal with different types of people. He is extremely organized and has already made a huge dent in this project. Thank you for the professional service and I will recommend Sigma Match for future staffing needs."

— IT Manager, State Agency

Why Sigma Solutions?

Vision: Our experience designing and integrating enterprise data center solutions gives our clients access to skills and expertise beyond their in-house IT teams and traditional resellers.

Execution: Our highly-trained professional services team configures and implements complex projects with hardware and software from multiple vendors and suppliers.

Operations: Our managed services team removes the burden of managing specific IT resources, allowing in-house IT teams to focus on more strategic initiatives.

Expertise: Our unmatched technical expertise has been developed via investments in training, certification and technologies.

Proof: Our extensive lab and equipment pool is available for proof-of-concept development and "try before you buy" demonstrations.

Sigma Solutions is the solutions integrator of choice for enterprise companies needing a technology partner that easily transitions from the strategy of the executive suite to the operations of the data center.
