

Consult

Sigma Solutions Professional Services

We offer the perfect mix of business acumen and technical expertise to help you leverage your IT infrastructure to its greatest advantage:

- Align technology assets with business objectives
- Leverage comprehensive skills and experience
- Seamlessly scale to meet changing demand

Sigma Solutions Professional Services Storage Practice

The Sigma Solutions Professional Services Storage Practice provides storage solution services that help increase the reliability, availability and efficiency of storage environments. We partner with storage manufacturers and industry leaders to deliver vendor-specific skills and certifications, as well as cross-brand expertise.

Our experts can help you build a storage infrastructure, optimize it, protect it and manage it. From simple, direct-attached primary storage to high-end enterprise storage arrays networked across multiple sites, Sigma offers industry-leading storage technologies that are backed by certified storage consultants.

Partnerships with EMC, NetApp, Cisco and Brocade allow us to objectively help you determine the best, most efficient storage solutions for your particular requirements and environment.

Storage Optimization

Sigma assesses your current environment, creating a long-term roadmap and outlining the steps that you can take to attain your objectives. We focus on solutions and best practices such as data classification, storage consolidation, storage virtualization and storage management.

Sigma Storage Consulting & Implementation Services

- Storage Assessment and Optimization Review Services for NetApp and EMC Solutions
- Enterprise System Disk Design, Planning, and Implementation Services for:
 - EMC VMAX
- Midrange System Disk Design, Planning and Implementation Services for:
 - EMC VNX, VNXe, and Isilon
 - NetApp FAS/V-Series Storage Systems
- Converged Infrastructure
 - VCE Vblock
 - EMC VSPEX
 - NetApp FlexPod
- NetApp and EMC Health Check Assessments

Sigma Solutions Professional Services Offerings

The Sigma Solutions Professional Services organization leverages strong partner technologies and certified and experienced Sigma Solutions technical resources to enhance customers' return on investment and satisfaction.

Our best-practice Consult, Implement, and Operate (CIO) services model allows for optimal system configurations and employs tools to effectively design and implement optimal solutions.

Solution Health Checks and Assessments

Our Assessment Services help you determine your IT infrastructure's compliance to best practices and policies and/or readiness to support new technology and applications. With Sigma Solutions' Assessment Services you receive detailed recommendations for improving your environment's operational maturity as well as gap analysis for planned systems enhancements.

Solution Architecture Services

Today, many organizations recognize the ability of converging technologies to drive business change and improve efficiency. Sigma Solutions' suite of Technical Consulting Services improves your infrastructure performance, security and scalability thus allowing IT to increase return on investment and accelerate adoption of new technologies.

Our Design Services help you create a flexible, resilient, scalable architectural foundation to support your business solutions by developing designs specific to your IT environment including infrastructure, applications, operations processes and management.

Solution Implementation

Sigma Solutions' Professional Services team leverages proven methodologies and a clear project management plan to deploy, configure and test each new solution, and provides knowledge transfer and documentation to facilitate a smooth transition.

Technical Resident

Supplementing your in-house IT staff with Sigma Solutions' Technical Residents will enable your organization to operate more efficiently as you adopt the technological innovations that are critical for success. Our experts have experience in a wide range of technologies gained across numerous environments and vertical industries. Technical Resident personnel can also access our Professional Services Organization for additional technical depth and breadth.

Sigma Solutions is the solutions integrator of choice for enterprise companies needing a technology partner that easily transitions from the strategy of the executive suite to the operations of the data center. Private, Public and Hybrid Cloud Integration

Application Infrastructure Solutions

Why Sigma Solutions?

Vision: Our experience designing and integrating enterprise data center solutions gives our clients access to skills and expertise beyond their in-house IT teams and traditional resellers.

Execution: Our highly-trained professional services team configures and implements complex projects with hardware and software from multiple vendors and suppliers.

Operations: Our managed services team removes the burden of managing specific IT resources, allowing in-house IT teams to focus on more strategic initiatives.

Expertise: Our unmatched technical expertise has been developed via investments in training, certification and technologies.

Proof: Our extensive lab and equipment pool is available for proof-of-concept development and "try before you buy" demonstrations.
